## Stormwater Management & Water Storage Rebate Program Info Sheet – Fiscal Year 2023-2024

### Purpose

- The Stormwater Management & Water Storage Rebate program is designed to streamline JSWCD stormwater and water storage projects.
- This program was created in 2021 and has gained popularity.
- The purpose of this info sheet is to summarize rebate logistics and eligibility.
- An updated rebate packet was created July 2023.

### Program Logistics

- Must be planning the following feature(s): bioswale, planter, box, rain garden and/or rainwater harvest.
- This is a reimbursement program and funds will be paid out upon project completion.
- In order for items to be counted for reimbursement, they must be purchased *after* grant approval.
- Rebate applications are due quarterly mid-month (July 15, October 15, January 15, April 15) as funds allow.
- Rebates range from \$500 to \$5,000 based on project size.
- Project deadlines are 1 year from the approval date. For example, if a project is approved October 15, 2023, the project is due October 15, 2024.

### Program Eligibility

- Applicant must schedule a site visit with JSWCD (Kora Mousseaux) to determine final eligibility prior to application submittal.
- Property is in Jackson County, Oregon (see “Priority Areas”).
- Project requires stormwater features to filter, deter, drain or store stormwater.
- Project scope does not require large-scale multi-landowner stormwater mitigation (*maximum JSWCD contribution: \$5,000*); consult with JSWCD for alternative funding opportunities.
- Applicant owns the land or has authorization in writing to implement the project.
- Applicant has legal access to a source of water to irrigate stormwater feature plantings (if applicable).
- Applicant can demonstrate the ability to maintain the project.
- Applications will be ranked regarding their completeness, overflow plans, maintenance plans, stormwater features and reason for system installation. Drought emergencies and landscape scale (multi landowner involvement) will be prioritized.

### Priority Areas

- Currently this rebate will prioritize applications in the Eagle Point/Shady Cove areas.
- Areas outside this priority area will also be considered as funds allow.

### More Information

- See the JSWCD website to review the full rebate packet: <https://www.jswcd.org/stormwater-management-rebate-program>
- For questions contact Kora Mousseaux: [kora.mousseaux@jswcd.org](mailto:kora.mousseaux@jswcd.org)
